

Announcement: Ventura Aerospace has started AS 9100 Implementation & Certification

April 14, 2010

It is our pleasure to announce that **Ventura Aerospace, Inc. in Van Nuys, California** has contracted with California Manufacturing Technology Consulting (CMTC) and is in process of implementing a companywide quality system that meets the requirements of AS 9100, the international quality management system standard for aviation, space and defense organizations. Already a premier supplier of aerospace and defense industry product, **Ventura Aerospace, Inc.** is taking this bold step to ensure that its quality management system is among the best in the world.

The implementation project began March 2010 and has a targeted completion date of August 31, 2010, at which time **Ventura Aerospace, Inc.** will be seeking AS 9100-C certification of their quality management system by an internationally accredited registration organization.

To date, CMTC has completed more than 500 quality management system related projects for California manufacturers. A private, not-for-profit organization, CMTC has a staff of more than 75 technical and business professionals helping small and medium size manufacturing and distribution companies become more productive, effective and profitable. We are proud to be working with **Ventura Aerospace, Inc.** and firmly believe that its commitment to quality will benefit its customers and suppliers for many years to come.

Sincerely,

David J. Bye
Sr. Consultant
CMTC
